PROJECT 1 [Covid Information database management]:

DONE by: A. V. Vaishnav Nishanth

FILE NO: 2
FILE NAME: main_page_inputs.py

CODE:

```python
import user
import admin_inputs
import user_inputs

def mainpage():
    print("")
    print("                          COVID INFORMATION DATABASE")
    print("")
    print("[ User | Admin ]")
    print("")
    print("Input 1 --> [ Admin ]")
    print("Input 2 --> [ User ]")
    print("Input 3 --> [ Close the Application ]")
    print("")

    access_option=int(input(("Enter your option: ")))
    if access_option==1:
        admin_inputs.admin_login()
        admin_inputs.admin_actions()

    elif access_option==2:
        user.user_login()
        user_inputs.user_actions()

    elif access_option==3:
        print ("Thank you for using this application.")
```
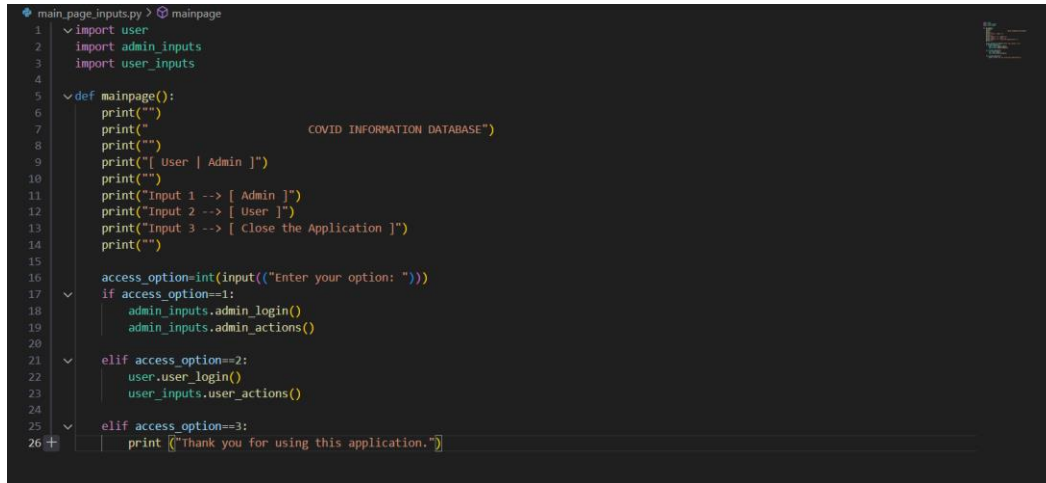

Screen Shots:

```python
main_page_inputs.py > mainpage

1    import user
2    import admin_inputs
3    import user_inputs
4
5    def mainpage():
6        print("")
7        print("                    COVID INFORMATION DATABASE")
8        print("")
9        print("[ User | Admin ]")
10       print("")
11       print("Input 1 --> [ Admin ]")
12       print("Input 2 --> [ User ]")
13       print("Input 3 --> [ Close the Application ]")
14       print("")
15
16       access_option=int(input(("Enter your option: ")))
17       if access_option==1:
18           admin_inputs.admin_login()
19           admin_inputs.admin_actions()
20
21       elif access_option==2:
